Currently working for an international company as an Automation Cloud Platform Engineer where I am focused on maintaining cloud infrastructure and developing and maintaining automation solutions. I have a degree in Electrical and Computer Engineering but main focus during studies was on programming in JAVA and C#. In search for new job opportunities where I can advance and develop current skills and gain new ones as well.

>>> EMPLOYMENT HISTORY

10/2024 – YET

AUTOMATION CLOUD PLATFORM ENGINEER, COVESTRO (SLOVAKIA) SERVICES S.R.O.

BRATISLAVA (SLOVAKIA)

- Maintain and optimize AWS automation infrastructure (EC2, VPC, networking) in collaboration with third-party providers.
- Design and implement automation solutions using AWS services, UiPath, and public APIs, leveraging Python and PowerShell for scripting.
- Leverage AWS AI/ML tools (SageMaker, Comprehend) and LLMs to develop intelligent automation workflows.
- Develop, test, and optimize automation workflows with advanced logging and reporting using Kibana and JIRA.
- Manage CI/CD pipelines, staging environments, and deployments following AWS best practices and security standards, utilizing Python and PowerShell for automation.
- Monitor AWS services (Cost Explorer, CloudWatch, Trusted Advisor) to ensure efficiency, security, and compliance.
- Lead automation projects, manage multiple initiatives in parallel, and work within Agile/Scrum frameworks.
- Work with SMEs, architects, and engagement teams to define requirements and deliver automation solutions.
- Contribute to international projects involving cognitive automation, AI, and machine learning solutions.
- Coordinate with AWS, UiPath, and other solution providers to ensure successful automation implementations.

07/2022 – 09/2024

RPA DEVELOPER / RPA CLOUD PLATFORM ENGINEER, COVESTRO (SLOVAKIA) SERVICES S.R.O.

BRATISLAVA (SLOVAKIA)
